CYBERSECURITY & RISK MANAGEMENT

Sôter Command

CISO AS-A-SERVICE

AN UNCOMFORTABLE QUESTION

Your job is to run the company. Not to be its CISO.

CISO (Chief Information Security Officer)

Yet in most SMEs the owner carries the cyber risk. By default. Without the time or the method, and since NIS2, with personal accountability attached.

THREE SENTENCES WE HEAR A LOT

"We have antivirus, a firewall and backups."

That is activity, not control. Nobody tells you whether it is enough.

"Our IT guy takes care of security."

He takes care of IT. Arbitrating business risk was never his mandate.

"We'll see if it happens to us."

You will learn where you stand on the day of the incident. That is the expensive way.

THE ANSWER

A senior CISO, a few days a month. He takes the cyber risk in hand. You run the company.

A method, a dashboard, a quarterly report to the Board. Not another IT vendor: someone at your leadership table, sized to the risk you actually carry.

Start with a Sôter Command Review

30 minutes to find out where you stand. No commitment.

DigiSôter

Sôter Command

CISO as-a-Service

DELIVERY On site, hybrid or fully remote. We work with clients worldwide.

WHAT AN ON-DEMAND CISO DOES FOR YOU

Strategy and governance

A roadmap tied to your business goals, clear roles, written decisions. The Board knows what it is accepting.

Risk steering

Risk map, priorities, control indicators. You decide on facts, not on this month's scare story.

Compliance that pays off

NIS2, CyFun, ISO 27001, DORA, CMMC. Programmes we have already run elsewhere. Compliance follows security, not the other way round.

From the Board to the shop floor

Executives, teams, operators: everyone knows what to do. Including in front of a USB stick or a vendor remote access.

Incidents and third parties

Response plan, crisis exercises, requirements for your subcontractors. On the day, nobody discovers the scenario.

Managed protection, optional

Sôter Shield, our ESET-based managed protection, from €5 per device per month. Separate contract: the person advising you is not the one selling licences.

FULL-TIME IN-HOUSE CISO OR CISO ON DEMAND?

	Full-time in-house CISO	Sôter Command
Cost	A fully loaded senior salary, twelve months a year, whether the seat is full or not.	**A monthly retainer sized to your risk, revised up or down.**
Time to start	Months of recruiting, in a market short of these profiles.	**Operational in weeks.**
Availability	One person. Holidays, illness, resignation: the seat is empty.	**A named CISO, a team behind him, contractual continuity.**
Expertise	One career, one sector.	**Industry, defence, energy, finance and SMEs.**
Independence	Depends on the IT hierarchy and its budgets.	**Reports to the executive. No licences to sell.**
Continuity	The knowledge leaves with the person.	**Policies, registers and dashboard stay with you.**
Board reporting	Depends on the profile and the personality.	**Quarterly, in executive language: risks, decisions, trends.**

Who decides on your cyber risk today? If no name comes to mind, it is yours.
